Performance gaps are **costing you millions.**

Mining operations face intense pressure to improve equipment productivity and lower operating costs to maintain margins.

However, the number of skilled and experienced workers in the industry is in decline making this challenge even harder. Raw data alone lacks the insight needed to unlock meaningful performance gains.

Efficiency Gains

iXcede **turns data into reliable insights**, enabling operating teams to increase production and lower costs.

How We Deliver

Our proprietary software delivers individualized insights for operators and line leaders, enabling tailored coaching that drives performance improvement and immediate operational impact.

Unmatched Data Accuracy

Reliable data delivers accurate insights and empowers your team to act confidently on informed feedback.

“Like-for-Like” Analysis

Operators are only compared to other operators in similar working conditions.

Trusted by Operators

Data accuracy and Like-for-Like analysis lead to a high level of trust by operators, openness to change, and results' ownership.

Personalised Coaching

Helping each operator and line leader to understand how they can improve productivity through detailed analysis of their performance.

Frontline Leaders

iXcede's Supervisor Module empowers superintendents and supervisors to identify improvement opportunities, recognise top performers, and guide underperforming teams, in alignment with site objectives.

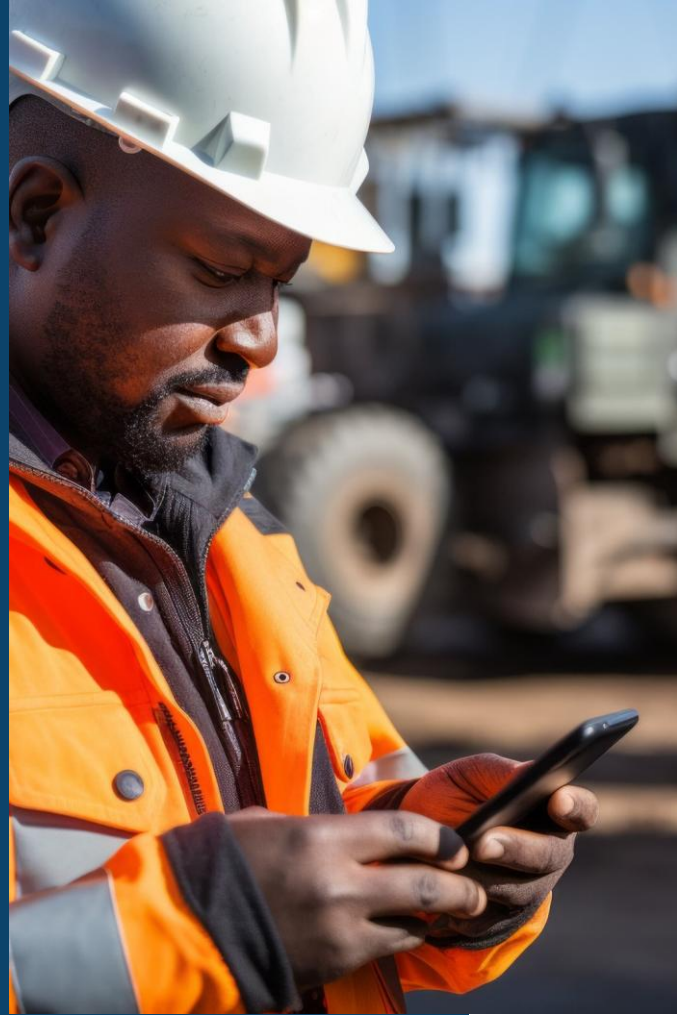

By equipping frontline leaders with actionable insights, our software supports the translation of business strategy into operational execution, ensuring the value targets are delivered.

Operator Module

Through iXcede's intuitive mobile application, operators can view their performance data, KPIs, goals, and team benchmarks.

By equipping teams with actionable insights and fostering a culture of continuous improvement, it helps drive productivity gains, optimise resource utilisation, and deliver sustained improvements in cost and profitability.
